## OBJECTIVE

Detail-oriented Web Developer with strong hands-on experience in the UAE, building responsive WordPress and custom PHP websites. Proficient in Elementor, WooCommerce, JavaScript, Tailwind CSS, React.js, and MySQL with expertise in customizing themes, optimizing SEO and delivering innovative, user-focused solutions. Seeking a new opportunity to apply my expertise and grow technically.

## EXPERIENCE

**Web Developer | Dec 2024 – June 2025**
**Digistromer - Business Bay, Dubai.**

- Built and hosted responsive WordPress websites using Elementor, customizing themes and plugins with PHP to adjust layouts, add features and deliver tailored functionality based on client requirements.
- Revamped outdated websites with modern themes to improve design, usability and performance.
- Implemented on-page SEO using the Yoast SEO plugin and improved site speed through caching , image optimization and hosting optimizations.
- Performed site migrations and backups using the All-in-One-WP Migration plugin to ensure safe updates and transfers.
- Strengthened website security with the Wordfence plugin to prevent malware and spam attacks.
- Created and scheduled engaging social media content, including posts, videos and reels across platforms, using canva and photoshop for design and editing.

  **Project 1** : **RNR Real Estate** – A complete dynamic real estate website that allows users to search, filter and book properties online. Developed in wordpress using the Houzez theme.

  **Project 2** : **One Limousine** – A Limousine rental website where users can check car availability and send auto  filled booking details via whatsapp. Built in wordpress using VikRent plugin.

  **Project 3** : **DeckAir Cargo** – A cargo services website showcasing company info and services.  Revamped using the Bravis theme for a modern, responsive layout and included a custom logo designed in Adobe Illustrator to match branding guidelines.

**Freelance Web Developer | 2023 – 2024**

- Developed and hosted websites using HTML, CSS, JavaScript, React.js, and PHP & MySQL.

  **Project 1 : Esteemed Medical & Dental supplies** – A static website to showcase medical & dental products with a contact form for inquiries. Developed using React.js and integrated with EmailJS for form submissions.

  **Project 2** : **Print Shopee** – A dynamic website for a digital wallpaper printing company. Built using PHP and MySQL, featuring an admin panel to add, edit and delete website content.

## SKILLS AND ABILITIES
